

On Track Refinish Acetone (ONT.ACE)

Safety Data Sheet ONT.ACE

According to OSHA Hazard Communication Standard, 29 CFR 1910.1200
Date of issue: 05/21/2015 Version: 19.0

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Product Name : Acetone
Recommended Use : Industrial Solvent.
Restrictions on Use : Restricted to Professional Users.

1.2. Relevant identified uses of the substance or mixture and uses advised against

1.3. Details of the supplier of the safety data sheet

Supplier
MCGEHEE & MCGEHEE ENTERPRISES INC
120 SOUTH BOGGESS AVENUE
- USA
T (270) 338-4600 - F (270) 338-4602

1.4. Emergency telephone number

Emergency number : 1-800-424-9300 (CHEMTREC)

SECTION 2: Hazards identification

2.1 GHS Classification

Flammable Liquids: Category 2
Serious Eye Damage/Eye Irritation: Category 2A
Specific Target Organ Toxicity - Single Exposure: Category 3
Aspiration Hazard: Category 2

2.2 GHS Label Element

Hazard Pictograms:

Hazard Statements:

H225 Highly flammable liquid and vapor.
H319 Causes serious eye irritation.
H336 May cause drowsiness or dizziness.
H305 May be harmful if swallowed and enters airways.

On Track Refinish Acetone (ONT.ACE)

Safety Data Sheet ONT.ACE

Precautionary Statements:

PREVENTION:

- P210 Keep away from heat/sparks/open flames/hot surfaces - No smoking.
P233 Keep container tightly closed.
P240 Ground/bond container and receiving equipment.
P241 Use explosion-proof electrical/ventilating/lighting/equipment.
P242 Use only non-sparking tools.
P243 Take precautionary measures against static discharge.
P280 Wear protective gloves/protective clothing/eye protection/face protection.
P264 Wash hands thoroughly after handling.
P261 Avoid breathing dust/fume/gas/mist/vapors/spray.
P271 Use only outdoors or in a well-ventilated area.

RESPONSE:

- P301+P312 IF SWALLOWED: Call a POISON CENTER or doctor/physician if you feel unwell.
P331 Do NOT induce vomiting.
P303 + P361 + P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower.
P304 + P340 IF INHALED: Remove person to fresh air and keep comfortable for breathing.
P312 Call a POISON CENTER or doctor/physician if you feel unwell.
P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P337 + P313 If eye irritation persists: Get medical advice/attention.

STORAGE:

- P403 + P233 Store in a well-ventilated place. Keep container tightly closed.
P235 Keep cool.
P405 Store locked up.

DISPOSAL:

- P501 Dispose of contents and container to appropriate waste site or reclaimer in accordance with local and national regulations.

2.3 Other Hazards Which Do Not Result in Classification

Exposure may enhance the toxicity of other materials. Repeated exposure may cause skin dryness or cracking. Slightly irritating to respiratory system. The classification of this material is based on OSHA HCS 2012 Criteria.

SECTION 3: Composition/Information on ingredients

Substance/Mixture: Substance

Synonyms: Dimethyl Ketone, propan-2-one, 2-Propanone

Chemical Nature: Solvent

HAZARDOUS COMPONENTS

CHEMICAL NAME	SYNONYMS	CAS NO.	CONCENTRATION (%)
Acetone	acetone	67-64-1	<= 100
Benzene	benzene	71-43-2	<= 0.003

On Track Refinish Acetone (ONT.ACE)

Safety Data Sheet ONT.ACE

SECTION 4: First aid measures

4.1 General Advice

Not expected to be a health hazard at ambient temperature.

4.2 If Inhaled

Remove to fresh air. If rapid recovery does not occur, transport to nearest medical facility for additional treatment.

4.3 In Case of Skin Contact

Remove contaminated clothing. Flush exposed area with water and follow by washing with soap if available. If persistent irritation occurs, obtain medical attention.

4.4 In Case of Eye Contact

DO NOT DELAY.

Flush eye with copious quantities of water. Obtain medical treatment immediately.

4.5 If Swallowed

If swallowed, do not induce vomiting; transport to nearest medical facility for additional treatment. If vomiting occurs spontaneously, keep head below hips to prevent aspiration. If any of the following delayed signs and symptoms appear within the next 6 hours, transport to the nearest medical facility: fever greater than 101 °F (38.3 °C), shortness of breath, chest congestion or continued coughing or wheezing.

4.6 Most Important Symptoms and Effects, both Acute and Delayed

Breathing of high vapor concentrations may cause central nervous system (CNS) depression resulting in dizziness, light-headedness, headache, nausea and loss of coordination. Continued inhalation may result in unconsciousness and death.

If material enters lungs, signs and symptoms may include coughing, choking, wheezing, difficulty in breathing, chest congestion, shortness of breath, and/or fever. Eye irritation signs and symptoms may include a burning sensation, redness, swelling, and/or blurred vision.

Defatting dermatitis signs and symptoms may include a burning sensation and/or a dried/cracked appearance. Skin irritation signs and symptoms may include a burning sensation, redness, swelling, and/or blisters.

4.7 Immediate Medical Attention, Special Treatment

Potential for chemical pneumonitis. Call a doctor or poison control center for guidance.

SECTION 5: Firefighting measures

5.1 Suitable Extinguishing Media

Alcohol-resistant foam, water spray or fog. Dry chemical powder, carbon dioxide, sand or earth may be used for small fires only.

5.2 Unsuitable Extinguishing Media

None.

5.3 Specific Hazards During Fire-Fighting

The vapor is heavier than air, spreads along the ground and distant ignition is possible. Carbon monoxide may be evolved if incomplete combustion occurs.

5.4 Specific Extinguishing Methods

Standard procedure for chemical fires.

5.5 Further Information

Clear fire area of all non-emergency personnel. Keep adjacent containers cool by spraying with water.

5.6 Special Protective Equipment for Firefighters

Proper protective equipment including chemical resistant gloves are to be worn; chemical resistant suit is indicated if large contact with spilled product is expected. Self-Contained Breathing Apparatus must be worn when approaching a fire in a confined space. Select fire fighter's clothing approved to relevant Standards (e.g. Europe: EN469).

On Track Refinish Acetone (ONT.ACE)

Safety Data Sheet ONT.ACE

SECTION 6: Accidental release measures

6.1 Personal Precautions, Protective Equipment and Emergency Procedures

Observe the relevant local and international regulations

Notify authorities if any exposure to the general public or the environment occurs or is likely to occur.

Local authorities should be advised if significant spillages cannot be contained.

The vapor is heavier than air, spreads along the ground and distant ignition is possible.

Vapor may form an explosive mixture with air.

Avoid contact with skin, eyes and clothing.

Isolate hazard area and deny entry to unnecessary or unprotected personnel.

Stay upwind and keep out of low areas.

6.2 Environmental Precautions

Shut off leaks, if possible without personal risks. Remove all possible sources of ignition in the surrounding area. Use appropriate containment to avoid environmental contamination. Prevent from spreading or entering drains, ditches or rivers by using sand, earth, or other appropriate barriers. Attempt to disperse the vapor or to direct its flow to a safe location for example by using fog sprays. Take precautionary measures against static discharge. Ensure electrical continuity by bonding and grounding (earthing) all equipment.

Ventilate contaminated area thoroughly.

Monitor area with combustible gas indicator.

6.3 Methods and Materials for Containment and Cleaning Up

For large liquid spills (> 1 drum), transfer by mechanical means such as vacuum truck to a salvage tank for recovery or safe disposal. Do not flush away residues with water. Retain as contaminated waste. Allow residues to evaporate or soak up with an appropriate absorbent material and dispose of safely. Remove contaminated soil and dispose of safely. For small liquid spills (< 1 drum), transfer by mechanical means to a labeled, sealable container for product recovery or safe disposal. Allow residues to evaporate or soap up with an appropriate absorbent material and dispose of safely. Remove contaminated soil and dispose of safely.

6.4 Additional Advice

For guidance on selection of personal protective equipment see Chapter 8 of this Safety Data Sheet.

For guidance on disposal of spilled material see Chapter 13 of this Safety Data Sheet.

U.S. regulations may require reporting releases of this material to the environment which exceed the reportable quantity (refer to Chapter 15) to the National Response Center at (800) 424-8802

SECTION 7: Handling and storage

7.1 Technical Measures

Avoid breathing of or direct contact with material. Only use in well ventilated areas. Wash thoroughly after handling. For guidance on selection of personal protective equipment see Chapter 8 of this Safety Data Sheet.

Use the information in this data sheet as input to a risk assessment of local circumstances to help determine appropriate controls for safe handling, storage and disposal of this material.

Ensure that all local regulations regarding handling and storage facilities are followed.

7.2 Precautions for Safe Handling

Avoid contact with skin, eyes and clothing. Use local exhaust ventilation if there is risk of inhalation of vapors, mists or aerosols.

7.3 Avoidance of Contact

Strong oxidizing agents.

7.4 Advice on Protection Against Fire and Explosion

Bulk storage tanks should be diked (bunded). Extinguish any naked flames. Do not smoke. Remove ignition sources. Avoid sparks. Electrostatic discharge may cause fire. Ensure electrical continuity by bonding and grounding (earthing) all equipment to reduce the risk. The vapors in the head space of the storage vessel may lie in the flammable/explosive range and hence may be flammable. Properly dispose of any contaminated rags or cleaning materials in order to prevent fires. Do NOT use compressed air for filling, discharging, or handling operations.

7.5 Product Transfer

Refer to guidance under Handling section.

On Track Refinish Acetone (ONT.ACE)

Safety Data Sheet ONT.ACE

7.6 Storage

CONDITIONS FOR SAFE STORAGE, INCLUDING ANY INCOMPATIBILITIES:

The vapor is heavier than air. Beware of accumulation in pits and confined spaces. Refer to section 15 for any additional specific legislation covering the packaging and storage of this product.

PACKAGING MATERIAL:

Suitable material: For containers, or container linings use mild steel, stainless steel.

Unsuitable material: Natural, butyl, neoprene or nitrile rubbers.

CONTAINER ADVICE:

Containers, even those that have been emptied, can contain explosive vapors. Do not cut, drill, grind, weld or perform similar operations on or near containers.

SPECIFIC USE(S):

Not applicable.

Ensure that all local regulations regarding handling and storage facilities are followed. See additional references that provide safe handling practices: American Petroleum Institute 2003 (Protection Against Ignition Arising out of Static, Lightning and Stray Currents) or National Fire Protection Agency 77 (Recommended Practices on Static Electricity.)

CENELEC CLC/TR 50404 (Electrostatics - Code of Practice for the avoidance of hazards due to static electricity).

SECTION 8: Exposure controls/personal protection

8.1 Components with Workplace Control Parameters

COMPONENTS	CAS NO.	VALUE TYPE (FORM OF EXPOSURE)	CONTROL PARAMETERS / PERMISSIBLE CONCENTRATION	BASIS
Acetone	67-64-1	TWA	500 ppm	ACGIH
		STEL	750 ppm	ACGIH
		TWA	1,000 ppm 2,400 mg/m ³	OSHA Z-1
Benzene	71-43-2	TWA	0.5 ppm 1.6 mg/m ³	Shell Internal Standard (SIS) for 8-12 hour TWA.
		STEL	2.5 ppm 8 mg/m ³	Shell Internal Standard (SIS) for 15 min (STEL).
		TWA	0.5 ppm	ACGIH
		STEL	2.5 ppm	ACGIH
		PEL	1 ppm	OSHA CARC
		STEL	5 ppm	OSHA CARC
		TWA	10 ppm	OSHA Z-2
		CEIL	25 ppm	OSHA Z-2
		Peak	50 ppm	OSHA Z-2

On Track Refinish Acetone (ONT.ACE)

Safety Data Sheet ONT.ACE

8.2 Biological Occupational Exposure Limits

COMPONENT	CAS NO.	CONTROL PARAMETERS	BIOLOGICAL SPECIMEN	SAMPLING TIME	PERMISSIBLE CONCENTRATION	BASIS
Acetone	67-67-1	Acetone	Urine	End of shift (as soon as possible after exposure ceases)	50 mg/l	ACGIH BEI

8.3 Monitorin Methods

Monitoring of the concentration of substances in the breathing zone of workers or in the general workplace may be required to confirm compliance with an OEL and adequacy of exposure controls. For some substances biological monitoring may also be appropriate.

Validated exposure measurement methods should be applied by a competent person and samples analysed by an accredited laboratory.

Examples of sources of recommended exposure measurement methods are given below or contact the supplier. Further national methods may be available.

National Institute of Occupational Safety and Health (NIOSH), USA: Manual of Analytical Methods <http://www.cdc.gov/niosh/>

Occupational Safety and Health Administration (OSHA), USA: Sampling and Analytical Methods <http://www.osha.gov/>

Health and Safety Executive (HSE), UK: Methods for the Determination of Hazardous Substances <http://www.hse.gov.uk/>

Institut für Arbeitsschutz Deutschen Gesetzlichen Unfallversicherung (IFA) , Germany <http://www.dguv.de/inhalt/index.jsp>

L'Institut National de Recherche et de Sécurité, (INRS), France <http://www.inrs.fr/accueil>

8.4 Engineering Measures

The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Select controls based on a risk assessment of local circumstances.

Appropriate measures include:

Use sealed systems as far as possible.

Adequate explosion-proof ventilation to control airborne concentrations below the exposure guidelines/limits.

Local exhaust ventilation is recommended.

Eye washes and showers for emergency use.

Firewater monitors and deluge systems are recommended.

Where material is heated, sprayed or mist formed, there is greater potential for airborne concentrations to be generated.

General Information:

Always observe good personal hygiene measures, such as washing hands after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned.

Practice good housekeeping.

Define procedures for safe handling and maintenance of controls.

Educate and train workers in the hazards and control measures relevant to normal activities associated with this product.

Ensure appropriate selection, testing and maintenance of equipment used to control exposure, e.g. personal protective equipment, local exhaust ventilation.

Drain down system prior to equipment break-in or maintenance.

Retain drain downs in sealed storage pending disposal or subsequent recycle.

On Track Refinish Acetone (ONT.ACE)

Safety Data Sheet ONT.ACE

8.5 Personal Protective Equipment

RESPIRATORY PROTECTION:

If engineering controls do not maintain airborne concentrations to a level which is adequate to protect worker health, select respiratory protection equipment suitable for the specific conditions of use and meeting relevant legislation.

Check with respiratory protective equipment suppliers.

Where air-filtering respirators are unsuitable (e.g. airborne concentrations are high, risk of oxygen deficiency, confined space) use appropriate positive pressure breathing apparatus.

Where air-filtering respirators are suitable, select an appropriate combination of mask and filter.

If air-filtering respirators are suitable for conditions of use:

Select a filter suitable for organic gases and vapours [Type AX boiling point $\leq 65^{\circ}\text{C}$ (149°F)].

Respirator selection, use and maintenance should be in accordance with the requirements of the OSHA Respiratory Protection Standard, 29 CFR 1910.134.

HAND PROTECTION REMARKS:

Where hand contact with the product may occur the use of gloves approved to relevant standards (e.g. Europe: EN374, US: F739) made from the following materials may provide suitable chemical protection. Longer term protection: Nitrile rubber gloves. Incidental contact/Splash protection: PVC or neoprene rubber gloves For continuous contact we recommend gloves with breakthrough time of more than 240 minutes

with preference for > 480 minutes where suitable

gloves can be identified. For short-term/splash protection we

recommend the same, but recognize that suitable gloves

offering this level of protection may not be available and in

this case a lower breakthrough time maybe acceptable so

long as appropriate maintenance and replacement regimes

are followed. Glove thickness is not a good predictor of glove

resistance to a chemical as it is dependent on the exact

composition of the glove material. Glove thickness should be

typically greater than 0.35 mm depending on the glove make

and model. Suitability and durability of a glove is dependent

on usage, e.g. frequency and duration of contact, chemical

resistance of glove material, dexterity. Always seek advice

from glove suppliers. Contaminated gloves should be replaced.

Personal hygiene is a key element of effective hand

care. Gloves must only be worn on clean hands. After using

gloves, hands should be washed and dried thoroughly. Application

of a non-perfumed moisturizer is recommended.

EYE PROTECTION:

Wear goggles for use against liquids and gas. Wear full face shield if splashes are likely to occur.

SKIN AND BODY PROTECTION:

Wear chemical resistant gloves/gauntlets and boots. Where risk of splashing, also wear an apron.

PROTECTIVE MEASURES:

Personal protective equipment (PPE) should meet recommended national standards. Check with PPE suppliers.

HYGIENE MEASURES:

Wash hands before eating, drinking, smoking and using the toilet. Launder contaminated clothing before re-use.

On Track Refinish Acetone (ONT.ACE)

Safety Data Sheet ONT.ACE

8.6 Environmental Exposure Controls

GENERAL ADVICE:

Local guidelines on emission limits for volatile substances must be observed for the discharge of exhaust air containing vapor.

Minimise release to the environment. An environmental assessment must be made to ensure compliance with local environmental legislation.

Information on accidental release measures are to be found in section 6.

On Track Refinish Acetone (ONT.ACE)

Safety Data Sheet ONT.ACE

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

On Track Refinish Acetone (ONT.ACE)

Safety Data Sheet ONT.ACE

Appearance	: Liquid.
Color	: Clear
Odor	: Characteristic
Odor threshold	: No data available
pH	: Not Applicable
Melting/Freezing Point	: Not Applicable
Boiling Point	: 56 °C / 133 °F
Flash Point	: -18 °C / -0.40 °F Method: IP 170
Evaporation Rate	: 5.6 Method: ASTM D 3539, nBuAc=1 2 Method: DIN 53170, di-ethyl ether=1
Flammability (solid, gas)	: In certain circumstances product can ignite due to static electricity.
Upper Explosion Limit	: ca. 13%(V)
Lower Explosion Limit	: ca. 2.1%(V)
Vapor Pressure	: 24.7 kPa (20 °C / 68 °F)
Relative Vapor Density	: 2 (20 °C / 68 °F)
Relative Density	: 0.792
Density	: 790 - 792 kg/m ³ (20 °C / 68 °F) Method: ASTM D4052
Solubility(ies)	
Water Solubility	: Completely miscible, completely miscible (20 °C / 68 °F)
Solubility in Other Solvents	: No data available
Partition Coefficient: n-octanol/water	: log Pow: 0.2
Auto-Ignition Temperature	: 540 °C / 1004 °F Method: ASTM D-2155
Decomposition Temperature	: No data available
Viscosity, Dynamic	: 0.33 mPa.s (20 °C / 68 °F)
Viscosity, Kinematic	: No data available
Explosive properties	: Not Applicable
Oxidizing Properties	: No data available
Surface tension	: 22.8 mN/m
Conductivity	: Electrical conductivity: > 10 000 pS/m, A number of factors, for example liquid temperature, presence of contaminants, and anti-static additives can great influence the conductivity of a liquid, This material is not expected to be a static accumulator.
Molecular weight	: 58.08 g/mol

On Track Refinish Acetone (ONT.ACE)

Safety Data Sheet ONT.ACE

SECTION 10: Stability and reactivity

10.1 Reactivity

The product does not pose any further reactivity hazards in addition to those listed in the following sub-paragraph.

10.2 Chemical Stability

No hazardous reaction is expected when handled and stored according to provisions.

10.3 Possibility of Hazardous Reactions

Reacts with strong oxidizing agents.

10.4 Conditions to Avoid

Avoid heat, sparks, open flames and other ignition sources. Prevent vapor accumulation. In certain circumstances product can ignite due to static electricity.

10.5 Incompatible Materials

Strong oxidizing agents.

10.6 Hazardous Decomposition Products

Thermal decomposition is highly dependent on conditions. A complex mixture of airborne solids, liquids and gases including carbon monoxide, carbon dioxide, sulphur oxides and unidentified organic compounds will be evolved when this material undergoes combustion or thermal or oxidative degradation.

SECTION 11: Toxicological information

11.1 Basis for Assessment

Information given is based on product testing.

11.2 Information on Likely Routes of Exposure

ACUTE TOXICITY

PRODUCT	
Acute Oral Toxicity	LD 50 (rat): > 5,000 mg/kg Remarks: Low Toxicity
Acute Inhalation Toxicity	LC 50 (rat): > 20 mg/l Exposure Time: 4 h Remarks: Low Toxicity: High concentrations may cause central nervous system depression resulting in headaches, dizziness and nausea; continued inhalation may result in unconsciousness and/or death.
Acute Dermal Toxicity	LD 50 (Rabbit): > 5,000 mg/kg Remarks: Low Toxicity:

11.3 Skin Corrosion/Irritation

PRODUCT:

Remarks: Not irritating to skin., Prolonged/repeated contact may cause defatting of the skin which can lead to dermatitis.

11.4 Serious Eye Damage/Eye Irritation

PRODUCT:

Remarks: Causes serious eye irritation.

11.5 Respiratory or Skin Sensitization

PRODUCT:

Remarks: Not expected to be a sensitizer.

On Track Refinish Acetone (ONT.ACE)

Safety Data Sheet ONT.ACE

11.6 Germ Cell Mutagenicity

PRODUCT:

Test Type: Reproductive and Developmental Toxicity

Remarks: Nor mutagenic

GERM CELL MUTAGENICITY ASSESSMENT:

This product does not meet the criteria for classification in categories 1A/1B.

11.7 Carcinogenicity

PRODUCT:

Remarks: Not expected to be carcinogenic.

CARCINOGENICITY ASSESSMENT:

This product does not meet the criteria for classification in categories 1A/1B.

IARC	No component of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by IARC.
ACGIH	Not classifiable as a human carcinogen. ACETONE - 67-64-1 No component of this product present at levels greater than or equal to 0.1% is identified as a carcinogen or potential carcinogen by ACGIH.
OSHA	No component of this product present at levels greater than or equal to 0.1% is identified as a carcinogen or potential carcinogen by OSHA.
NTP	No component of this product present at levels greater than or equal to 0.1% is identified as a known or anticipated carcinogen by NTP.

11.8 Reproductive Toxicity

PRODUCT:

Remarks: Causes slight foetotoxicity. Effects were seen at high doses only.

REPRODUCTIVE TOXICITY ASSESSMENT:

This product does not meet the criteria for classification in categories 1A/1B.

11.9 STOT - Single Exposure

PRODUCT:

Remarks: May cause drowsiness or dizziness.

11.10 STOT - Repeated Exposure

PRODUCT:

Remarks: Not expected to be a hazard.

11.11 Aspiration Toxicity

PRODUCT:

Aspiration into the lungs when swallowed or vomited may cause chemical pneumonitis which can be fatal.

11.12 Further Information

PRODUCT:

Remarks: Exposure may enhance the toxicity of other materials., May potentiate the peripheral neurotoxicity of n-hexane, and the liver and kidney toxicity of some chlorinated hydrocarbons such as Tetra chloro hydrocarbon., Classifications by other authorities under varying regulatory frameworks may exist.

On Track Refinish Acetone (ONT.ACE)

Safety Data Sheet ONT.ACE

SECTION 12: Ecological information

12.1 Basis for Assessment

Ecotoxicological data are based on product testing. Unless indicated otherwise, the data presented is representative of the product as a whole, rather than for individual component(s).

12.2 Ecotoxicity

PRODUCT	
Toxicity to Fish (Acute Toxicity)	Remarks: Practically non toxic: LL/EL/IL50 > 100 mg/l
Toxicity to Daphnia and Other Aquatic Invertebrates (Acute Toxicity)	Remarks: Practically non toxic: LL/EL/IL50 > 100 mg/l
Toxicity to Algae (Acute Toxicity)	Remarks: Practically non toxic: LL/EL/IL50 > 100 mg/l
Toxicity to Fish (Chronic Toxicity)	Remarks: Data not available.
Toxicity to Daphnia and Other Aquatic Invertebrates (Chronic Toxicity)	Remarks: NOEC/NOEL > 10 - <= 100 mg/l
Toxicity to Bacteria (Acute Toxicity)	Remarks: Practically non toxic: LL/EL/IL50 > 100 mg/l

12.3 Persistence and Degradability

PRODUCT:

Biodegradability: Remarks: Readily biodegradable.

12.4 Bioaccumulative Potential

PRODUCT:

Bioaccumulation: Remarks: Not expected to bioaccumulate significantly.

12.5 Mobility in Soil

PRODUCT:

Mobility: Remarks: If product enters soil, it will be highly mobile and may contaminate groundwater. Dissolves in water.

12.6 Other Adverse Effects

No data available

PRODUCT:

Additional Ecological Information: None known.

SECTION 13: Disposal considerations

13.1 Disposal Methods

Waste from Residues	Recover or recycle if possible. It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste classification and disposal methods in compliance with applicable regulations. Do not dispose into the environment, in drains or in water courses. Waste product should not be allowed to contaminate soil or water.
Contaminated Packaging	Drain container thoroughly. After draining, vent in a safe place away from sparks and fire. Residues may cause an explosion hazard. Do not, puncture, cut, or weld uncleaned drums. Send drum recoverer or metal reclaimer.

On Track Refinish Acetone (ONT.ACE)

Safety Data Sheet ONT.ACE

Local Legislation Remarks

Local regulations may be more stringent than regional or national requirements and must be complied with. Disposal should be in accordance with applicable regional, national, and local laws and regulations. Comply with any local recovery or waste disposal regulations.

SECTION 14: Transport information

14.1 National Regulations

US DEPARTMENT OF TRANSPORTATION CLASSIFICATION (49 CFR Parts 171-180)

UN/ID/NA Number: UN 1090

Proper Shipping Name: ACETONE

Class: 3

Packing Group: II

Labels: 3

Reportable Quantity: ACETONE (5,000 lb)

ERG Code: 127

Marine Pollutant: no

Remarks: Refer to Chapter 7, Handling & Storage, for special precautions which a user needs to be aware of or needs to comply with in connection with transport.

14.2 International Régulation

IATA-DGR

UN/ID No.

UN 1090

Proper Shipping Name

ACETONE

On Track Refinish Acetone (ONT.ACE)

Safety Data Sheet ONT.ACE

UN Number	UN 1090
Proper Shipping Name	ACETONE
Class	3
Packing Group	II
Labels	3
Marine Pollutant	no
Transport in Bulk according to Annex II of MARPOL 73/78 and the IBC Code	
Pollution Category	Z
Ship Type	2
Product Name	Acetone
Special Precautions	Refer to Chapter 7, Handling and Storage, for special precautions which a user needs to be aware of or needs to comply with in connection with transport.

14.3 Special Precautions for User

REMARKS:

Refer to Chapter 7, Handling & Storage, for special precautions which a user needs to be aware of or needs to comply with in connection with transport.

ADDITIONAL INFORMATION:

This product may be transported under nitrogen blanketing. Nitrogen is an odorless and invisible gas. Exposure to nitrogen-enriched atmospheres displaces available oxygen which may cause asphyxiation or death. Personnel must observe strict safety precautions when involved with a confined space entry.

SECTION 15: Regulatory information

15.1 OSHA Hazards

Vapors may cause drowsiness and dizziness., Harmful: may cause lung damage if swallowed., Irritating to eyes., Extremely flammable. Flammable Liquid.

15.2 EPCRA - Emergency Planning and Community Right-To-Know Act

EWC - EUROPEAN WASTE CODE
GHS - GLOBALLY HARMONISED SYSTEM OF CLASSIFICATION AND LABELLING OF CHEMICALS
IARC - INTERNATIONAL AGENCY FOR RESEARCH ON CANCER
IATA - INTERNATIONAL AIR TRANSPORT ASSOCIATION
IC50 - INHIBITORY CONCENTRATION FIFTY
IL50 - INHIBITORY LEVEL FIFTY
IMDG - INTERNATIONAL MARITIME DANGEROUS GOODS
INV - CHINESE CHEMICALS INVENTORY
IP346 - INSTITUTE OF PETROLEUM TEST METHOD N° 346 FOR THE DETERMINATION OF POLYCYCLIC AROMATICS DMSO-EXTRACTABLES
KECI - KOREA EXISTING CHEMICALS INVENTORY
LC50 - LETHAL CONCENTRATION FIFTY
LD50 - LETHAL DOSE FIFTY PER CENT.
LL/EL/IL - LETHAL LOADING/EFFECTIVE LOADING/INHIBITORY LOADING
LL50 - LETHAL LOADING FIFTY
MARPOL - INTERNATIONAL CONVENTION FOR THE PREVENTION OF POLLUTION FROM SHIPS
NOEC/NOEL - NO OBSERVED EFFECT CONCENTRATION/NO OBSERVED EFFECT LEVEL
OE_HPVS - OCCUPATIONAL EXPOSURE - HIGH PRODUCTION VOLUME
PBT - PERSISTENT, BIOACCUMULATIVE AND TOXIC
PICCS - PHILIPPINE INVENTORY OF CHEMICALS AND CHEMICAL SUBSTANCES
PNEC - PREDICTED NO EFFECT CONCENTRATION
REACH - REGISTRATION EVALUATION AND AUTHORIZATION OF CHEMICALS
RID - REGULATIONS RELATING TO INTERNATIONAL CARRIAGE OF DANGEROUS GOODS BY RAIL
SKIN_DES - SKIN DESIGNATION
STEL - SHORT TERM EXPOSURE LIMIT
TRA - TARGETED RISK ASSESSMENT
TSCA - US TOXIC SUBSTANCES CONTROL ACT

On Track Refinish Acetone (ONT.ACE)

Safety Data Sheet ONT.ACE

TWA - TIME-WEIGHTED AVERAGE

vPvB - VERY PERSISTENT AND VERY BIOACCUMULATIVE

Sources of Key Data Used to Compile the Safety Data Sheet:

The quoted data are from, but not limited to, one or more sources of information (e.g. toxicological data from Shell Health Services, material suppliers' data, CONCAWE, EU IUCLID data base, EC 1272 regulation, etc).

Revision Date: 05/21/2015

This information is based on our current knowledge and is intended to describe the product for the purposes of health, safety and environmental requirements only. It should not therefore be construed as guaranteeing any specific property of the product.
