SECTION 3: Composition/Information on ingredients

CHEMICAL NAME	WT.%	CAS NUMBER
Methylene Chloride	70-74	75-09-2
Isobutane	10-14	75-28-5
Toluene	4-6	108-88-3
Methanol	4-6	67-56-1

COMMENTS: There are not additional ingredients present which, within the current knowledge of the supplier, are classified and contribute to the classification of the product and hence require reporting in this section.

SECTION 4: First aid measures

4.1 Eye Contact

In case of contact, immediately flush eyes, keeping eyelids open, with plenty of water for at least 15 minutes. Get medical attention, if irritation persists.

4.2 Skin Contact

Wash with soap and water. Get medical attention if irritation develops or persists. Remove contaminated clothing and wash before reuse.

4.3 Ingestion

If swallowed, do NOT induce vomiting. Give victim a glass of water or milk. Call a physician or poison control center immediately. Never give anything by mouth to an unconscious person.

4.4 Inhalation

Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get immediate medical attention.

4.5 Signs and Symptoms of Overexposure

EYE CONTACT:

Contact causes serious eye irritation. Symptoms may include pain, tearing, reddening and swelling accompanied by a stinging sensation and or a feeling like that of fine dust in the eyes.

SKIN CONTACT: Causes severe skin irritation. May be absorbed through the skin in harmful amounts. Vapor inhalation and/or skin absorption can cause central nervous system effects and blindness.

INGESTION: May cause irritation. Symptoms of ingestion may include abdominal pain, nausea, vomiting and diarrhea. Poison, May be fatal or cause blindness if swallowed.

INHALATION: High vapor or spray mist concentrations may be harmful if inhaled. Prolonged or excessive inhalation may cause respiratory tract irritation. May cause headaches and dizziness. High vapor concentrations may cause drowsiness. High concentrations may lead to central nervous system effects (drowsiness, dizziness, nausea, headaches, paralysis and loss of consciousness). Prolonged or repeated inhalation may cause lung damage and/or central nervous system disturbances. High vapor concentrations can displace oxygen in enclosed spaces and cause asphyxiation.

Notes to Physician: Treatment of overexposure should be directed at the control of symptoms and the clinical conditions of the patient.

Additional Information: No data available.
